

Research Projects of the Reproductive research Center

Row	Title	Supervisor	Year
1	Investigating the relationship between maternal emotions and attitudes toward breastfeeding with breastfeeding self-efficacy in primiparous mothers with children under three months under the auspices of Urmia Comprehensive Health Services Centers in 2022	Dr. Soheila Rabiempoor	2022
2	Evaluation of the effect of melatonin on the follicular oxidative stress and quality of oocyte and embryo in women with Diminished ovarian reserve (DOR)	Dr. Hojjat Ghasemnejad berenji	2022
3	evaluation of the effect of Menstrual blood-derived stem cells (MenSCs) endometrial regeneration in the experimental model of Ashermans syndrome	Hojjat Ghasemnejad berenji	2022
4	Evaluation of endometrial Foxp3 / Ror- γ t ratio during mid-luteal phase as a pregnancy predictor in patients undergoing in vitro fertilization	Dr. Hojjat Ghasemnejad berenji	2022
5	Evaluation effect of salinomycin on human endometriotic stromal cells in vitro	Dr. Hojjat Ghasemnejad berenji	2022
6	Association assessment of age, lifestyle and underlying diseases with semen quality in Men Referred to Urmia University of Medical sciences Infertility center	Hojjat Ghasemnejad berenji	2022
7	Association between the dietary inflammatory index and inflammatory biomarkers with SemenQuality in Men Referring to Infertility Center of Urmia University of Medical Sciences	Dr. Hojjat Ghasemnejad berenji	2022
8	Evaluation of the effect of human placenta extract on the intra- abdominal inflammatory environment in Ovarian endometrioma and endometriosis	Dr. Hojjat Ghasemnejad berenji	2022
9	Study of the protective effects of empagliflozin on torsion/detorsion induced testicular injury in rats	Dr. Morteza Ghasemnejad berenji	2022
10	Evaluation of the effects of lutein on improving spermatogenesis in Cyclophosphamide-induced azoospermia mice	Dr. Hojjat Ghasemnejad berenji	2022
